## ERV Session Procedures Report (S/NF/SK)

Control Number	: 8702
Date of Session	: 19Mar87
Date of Report	: 19Mar87
Source Identifier	: 101

1. (S/NF/SK) Tasking: Original tasking data sheet attached. Monitor granted access to complete tasking packet on 28 Jan 87. No additional tasking received.

2. (S/NF/SK) Session: Source had not worked this target prior to the session. Interviewer noted that source was in a good mood and did not manifest inclemencies. Interviewer took with him into the room an envelope containing a photo of the target building. Interviewer "created" a set of coordinates and "assigned" them to the target. Source entered the room about 10 minutes after the interviewer was seated, went back out momentarily because he had forgotten to remove his money and watch from his person, then reentered and made himself comfortable. Coordinates were given at 0823, then again when source reached "sanctuary", at 0831. Source took a normal "joy ride" at first, (describing "land...open, trees, hills and mountains in distance"). Interviewer cut this short by reading the coordinates again (at 0833), which apparently sent source directly to the correct target. Interviewer ended session at 0906.

3. (S/NF/SK) Summary: "Large structure, natural materials, older, tall, storied; entrance, semi-protected; outside structure..kind of flat..air quality is poor..building has exhausts or chimneys on roof..fairly tall building, on a street, asphalt street..lines of building ninety degrees..its not architechurally pleasing. [Removing walls] Searching, scanning, changing, cheating, seizing, covert, cantally(?), cool, crossover, linking, adjusting, opening, partitioning, (mumble), close, cruel, coarse, crusty. [Return to present time, explore deeper into the building] //0849// Seems to be a certain area primarily occupied by women--like women are good secretaries..down lower, closed-in area..poor lighting on the inside, looks like inside of a bank from the 1880's..cages, dark. 4. (S/NF/SK) Post Session Debrief: Source sketched a 9 or 10 story building with "things sticking up from the top". Source states that the top of building was open in places during construction, so that one could look out over the city. (Source AOL of "an embassy in a European city; the well-dressed man was the ambassador").

5. (S/NF/SK) Feedback: Source was informed that he had acquired the target and had helped answer the intel question. No other feedback provided.
